This Amendment No. 02 is issued to the above referenced Solicitation Number to replace pages with those that have corrections and/or changes made to them as identified by the black lines in the right margin. Please replace the following pages with those currently in the solicitation package, and to Provide 8 sheets which are copies of the bed areas on the East Front of the Capitol showing, in red, the outlines of the tree root zones. All shrubs within these root zones should be air-spaded in. Groundcover does not need to be air-spaded in. The provided maps also show trees which have been removed since the project drawings were completed. The root zones are estimated areas and should not be considered limits, either maximum or minimum. The actual limit of air-spading shall be determined by the Contract Arborist, with final approval by the Architect.

Shrub material should be planted no closer to an existing tree's trunk than twice the trunk's dbh (diameter at breast height). For example, if a tree's diameter is four (4) feet dbh, shrub material should be planted at least eight (8) feet away from the tree's trunk. Because the anchoring roots are so extensive close to the trunk.

CVC Project fence will be in place during this project.

This project shall proceed once a 'Notice to Proceed' has been given.
